

# Lab 8 Using Vim

## Question 2

```
# What is Linux?
Linux is an open-source operating system.
# 3 Reasons to use Linux:
* Linux is an open source and freely available desktop environment for users
* Linux is considered a reliable OS and is well-supported with security patches
* Linux generally doesn't change modes of operation with new releases
# Other operating systems
* Microsoft Windows is a group of several proprietary graphical operating system families, all of which are developed and marketed by Microsoft.
* macOS is a series of proprietary graphical operating systems developed and marketed by Apple Inc.
* FreeBSD is a free and open-source Unix-like operating system descended from the Berkeley Software Distribution (BSD), which was based on Research Unix.
* RISC OS is a computer operating system originally designed by Acorn Computers Ltd in Cambridge, England.
